

Getting Started (everyone)

Welcome to the NEDS CRM. This covers the basics every team member needs.

1. Logging in

1. Go to **https://crm.talktonitesh.com**.
2. Enter the **email** and **temporary password** your administrator gave you.
3. Click **Log in**.

If you ever forget your password, an admin can reset it for you from the Users screen.

2. First login — set up Two-Factor Authentication (admins & managers)

For security, **admins and managers must set up an authenticator app** the first time they log in. (Sales, support and accounts users skip this.)

1. After logging in you'll land on the **2FA setup** screen.
2. Open an authenticator app on your phone — **Google Authenticator, Authy,** or **1Password** all work.
1. **Scan the QR code** (or type the key shown).
2. Enter the **6-digit code** the app shows and click **Confirm**.
3. **Save your recovery codes** somewhere safe — each can be used once if you

lose your phone.

From then on, you'll enter a 6-digit code each time you log in.

3. Change your password

Click your **name** (top-right) → **Profile** → **Update Password**. Set a password only you know.

4. Finding your way around

- **Left sidebar** — your modules. What you see depends on your role.
- **Search bar** (top) — find any client, lead, deal, invoice, ticket or project

by name or number.

-  **Log a call** (top) — quickly record a phone call with a client or lead.
-  **Bell icon** (top) — your notification centre. Alerts vary by role but include: tasks assigned to you, call follow-up reminders, new leads, deal won, payment recorded, and upcoming recurring invoice due dates. Click a notification to go straight to the record; click **Dismiss** to clear it.
- **Your name** (top-right) — Profile and Log out.

4a. Overdue tasks alert

If you have any tasks past their due date, a **red banner** appears at the top of

your dashboard when you log in. Click **View tasks** → to see them and clear the backlog.

5. Attendance — check in and out

On the **Dashboard**, use the attendance widget:

- **Check in** when you start your day.
- **Check out** when you finish.

Also do your biometric fingerprint punch as usual — do both, not one or the other. The two work together automatically: your CRM check-in/out marks you present immediately, and your biometric punch fills in or corrects the exact time within a few minutes once it syncs. Whichever is the **earliest** check-in and **latest** check-out (from either source) is what's kept — so there's no conflict and nothing to undo if both are recorded.

Your manager can see attendance, and it feeds the performance reports.

5a. Requesting leave

Open **Leave Requests** in the sidebar to apply: pick a start date, end date, and a short reason, then submit. Any admin or manager can approve or reject it — you'll get a bell notification either way. Once approved, your attendance for those days is automatically marked **Leave** (Sundays are skipped since they're not office days). You can cancel a request yourself as long as it's still pending.

6. Daily report — end of day

At the end of the day, open **Daily Reports** and submit a short "what I did today". Some numbers (tasks completed, calls made) are filled in automatically; add a sentence or two on your day and submit. You'll get a reminder at 6 PM.

7. Morning digest email

Every morning at **9 AM** you'll receive a personalised email summarising your day — overdue tasks, tasks due today, call follow-ups, and any open tickets assigned to you. No email means you have a clean plate for the day.

If anything is due, the email opens with a short **AI-written summary** of what to prioritize — the same text also appears as a banner on your dashboard for the rest of the day. It's generated only from your own tasks/follow-ups, never invents anything, and disappears automatically the next day.

8. Logging out

Click your **name** (top-right) → **Log Out**. Always log out on shared devices.

Next: read the guide for your role — [Sales](#), [Support](#),
[Accounts](#), [Manager](#), [Admin](#), or
[Intern](#).
