

Client Portal — Recording Script

Audience: clients (not staff). This is an onboarding video NEDS shares with a client after inviting them to the portal — the "SAY" lines below speak directly to the client, matching [docs/user-guides/client-portal.md](#).

Target length: ~7 minutes

Before you record: log in to a real (or demo) client portal account that has at least one invoice, one quotation, one active project with a team member and an update posted, and — if set up — Drishti/SMDost access and WhatsApp support enabled, so every section has something real to show.

Scene 1 — Intro and logging in (0:00–0:40)

ON SCREEN: The portal sign-in page, <https://crm.niranjanenterprises.co.in/portal/login>.

SAY: "Hi, welcome to your NEDS client portal! This is where you can see your invoices and projects, raise support requests, and stay updated on the work we're doing for you. You'll have received an invitation email with a link to set your password — click that, choose a password, and you're in. After that, just come back to this page any time and sign in with your email and password."

Scene 2 — Finding your way around (0:40–1:20)

ON SCREEN: Point at the left sidebar (or hamburger menu on mobile) — Dashboard, Services, Quotations, Invoices, Projects, Tickets.

SAY: "On the left, you've got five sections: Dashboard for your account summary, Services for everything we're running for you, Quotations for proposals we've sent, Invoices, Projects for status and updates, and Tickets for support. Your name and company are at the bottom — click Sign out there when you're done."

Scene 3 — Dashboard (1:20–2:30)

ON SCREEN: Portal Dashboard — stat cards, an announcement banner if one exists, then type a question into "Ask about your account."

SAY: "Your Dashboard gives you the summary — open invoices, active projects, open tickets, right up top. Click any of those cards to jump straight to that section. If we've posted an announcement — a holiday notice, a service update — you'll see it as a banner here too. One more thing worth trying: 'Ask about your account.' Type something like 'When's my next payment due?' or 'What's the status of my SEO project?' and you'll

get an instant answer based on your own account — it only knows what's already in your portal, so for anything else, it'll point you to raise a ticket or contact your account manager."

Scene 4 — Services (2:30–3:10)

ON SCREEN: Open Services → point at Active Services and Retainer Services sections.

SAY: "Services shows everything we're running for your account in one place — each one with its current status and the name and email of the person on our team handling it. Click 'View updates' to jump straight to that project. If you're on a monthly retainer — SEO, GMB, social media — you'll see that listed too, with the billing frequency and your account manager. Got a question about a specific service? Use the Raise a ticket link right there so it's tracked properly."

Scene 5 — Quotations and Invoices (3:10–4:10)

ON SCREEN: Open Quotations → point at status column. Then Invoices → click Download on one, then scroll to Upcoming Billing Schedule.

SAY: "Quotations lists every proposal or estimate we've sent you — the number, date, status, validity, and total, so you've always got a record of what was agreed before any invoice goes out. Invoices shows all of yours with status — Sent, Partially Paid, Paid, or Overdue — the total and what's still owed, and a Download button for a PDF copy. Click any invoice number to see the full line-item and payment breakdown. Below the list, Upcoming Billing Schedule shows your active recurring services and the date your next invoice will be generated — and you'll also get an email reminder a week before each billing date."

Scene 6 — Projects (4:10–5:10)

ON SCREEN: Open Projects → click into one → point at Status, Timeline, Your NEDS Team, and Updates from Our Team. If a Schedule a Meeting link exists, point at it too.

SAY: "Projects shows everything we're building or running for you. Click into one and you'll see its status, timeline, and Your NEDS Team — the people handling this specific service, with their email so you can reach them directly; the Lead is your main point of contact. Updates from Our Team is where we post progress notes as work moves forward — new ones show up automatically, you don't need to ask. If you see a 'Schedule a Meeting' link, click it to open your team member's calendar and pick a time — it sets up a Google Meet automatically. That link only shows up

once your account manager has it configured."

Scene 7 — Raising a support ticket (5:10–6:10)

ON SCREEN: Tickets → New Ticket → fill subject/description → point at the "Which service is this about?" dropdown → choose priority → Submit → open the ticket and reply → point at a "How did we do?" rating on a resolved ticket.

SAY: "Whenever you need anything, go to Tickets, New Ticket — or click 'Raise a ticket' from wherever you are in the portal. Give it a subject and describe the issue. If you've got more than one active service with us, you'll see a 'Which service is this about?' dropdown — pick the right one so it goes straight to the correct person, or leave it as General if you're not sure. Choose a priority and submit — our team's notified right away. You can reply anytime to keep the conversation going, right on the ticket page — and just so you know, any internal notes our team leaves for each other are never shown to you, you only see what's meant for you. Once we've marked it Resolved or Closed, you'll see a quick 'How did we do?' prompt — rating it helps us, but it's entirely optional."

Scene 8 — Your NEDS Tools and WhatsApp (6:10–6:45)

ON SCREEN: Dashboard → "Your NEDS Tools" section, if enabled → click Open Drishti Dashboard / Open Social Media Dost. Then point at a "Chat on WhatsApp" button if enabled.

SAY: "If you've got access to our other platforms, you'll see a 'Your NEDS Tools' section on your Dashboard — Drishti for your audit reports and SEO tracking, or Social Media Dost to review and approve your content. Click either button and you're signed in automatically, no separate password. Those links stay signed in for about 10 minutes — if you ever see a sign-in error, just come back to the portal and click again for a fresh one. And if WhatsApp support is enabled for your account, you'll see a Chat on WhatsApp button too — good for anything urgent; it's handled by the same team and automatically creates a ticket, so nothing gets lost."

Scene 9 — Security and wrap-up (6:45–7:15)

ON SCREEN: Sign-in page → Forgot your password? link.

SAY: "A couple of last things. You'll only ever see your own company's information here — nobody else's. If you forget your password, click 'Forgot your password?' on the sign-in page, enter your email, and follow the reset link. And if someone else at your company needs access, or you lose access to your email address, just reach out to your NEDS account

manager and they'll sort it out. That's everything — welcome aboard, and we're glad to have you."
