

Intern — Recording Script

Audience: interns (watch [getting-started.md](#) first).

Target length: ~6 minutes

Before you record: log in as an intern-role test user. Have one project you're a member of and a couple of assigned tasks ready to show.

Scene 1 — Intro + dashboard (0:00–0:45)

ON SCREEN: Intern dashboard — the three cards.

SAY: "This one's for interns. You've got access to the parts of the system relevant to your day-to-day — clients, the projects you're on, your tasks, attendance, and daily reports. Your dashboard has three cards: pending tasks, what you've completed today, and your active projects — click any card to jump straight there."

Scene 2 — Clients, read-only (0:45–1:15)

ON SCREEN: Clients list, open one client record.

SAY: "Under Clients you can browse the full directory — company details, contacts, their services — but you can't create, edit, or delete anything here. It's there so you have context, not so you manage it."

Scene 3 — Your projects (1:15–2:15)

ON SCREEN: Project Updates → open a project → scroll to the notes feed → add a note.

SAY: "Project Updates shows only the projects you've been added to as a team member. You can read the details and the team notes feed, and add your own notes and updates — your manager decides whether a given note is shared with the client or stays internal. You can't create, edit, or delete a project itself."

Scene 4 — Tasks (2:15–3:00)

ON SCREEN: Employee Task list, change a task's status, add a comment.

SAY: "Employee Task, or Emptask, is your task list. Move a task through To Do, In Progress, Done as you work on it, and add comments if useful. You can also create your own tasks here — handy for tracking your own to-dos."

Scene 5 — Attendance (3:00–4:00)

ON SCREEN: Attendance widget on the dashboard, then Attendance in the

sidebar showing history.

SAY: "For attendance, do both: use the Check In and Check Out buttons on your dashboard, and also punch the biometric machine when you arrive and leave, same as everyone else — they work together, not one instead of the other. Under Attendance in the sidebar you can see your own history. If you ever need a correction — you forgot to punch, or the machine was down — ask your admin or manager, only they can edit attendance records."

Scene 6 — Daily report (4:00–4:45)

ON SCREEN: Daily Reports form.

SAY: "At the end of each day, open Daily Reports and write a quick summary of what you worked on — some numbers are already filled in for you. You'll get a reminder at 6 PM if you haven't submitted yet."

Scene 7 — Your Productivity, Reminders, and what's off-limits (4:45–6:00)

ON SCREEN: Point at the "Your Productivity This Month" widget, then the Reminders card.

SAY: "Two things on your dashboard worth knowing. 'Your Productivity This Month' shows your rank among other interns — private, nobody else sees your rank and you don't see theirs — plus your single biggest opportunity area. If AI's enabled, click 'Get tips to improve' for a specific suggestion. And the Reminders card shows any nudges targeted at you — click Done once you've handled one, or Snooze to hide it from your own view for a few days. Last thing — a few modules aren't available to interns: leads, deals, quotations, invoices, tickets, calling, partners, services, and the user/menu admin pages. If something comes up that needs one of those, just flag it to your manager or leave a note on the relevant project. That covers everything for interns."
